Summary

Frontend developer with ~4 years of experience building scalable Angular applications using TypeScript and RxJS. Skilled in performance optimization, reusable component design, and delivering maintainable solutions across enterprise applications.

Skills

Frontend: Angular, TypeScript, JavaScript, RxJS, HTML, CSS

Tools & Testing: Git, Angular CLI, Jasmine, Karma

Concepts: Performance Optimization, Responsive Design, REST APIs

Experience

Senior Software Engineer, Indegene – Noida, India Aug 2025 – Present

- Accelerated client acquisition by leading development of 3 high-quality POCs under tight deadlines, enabling onboarding of 2 enterprise clients.
- Led frontend development across 3 Angular projects, ensuring 95% on-time sprint delivery and minimal rework through effective planning and task delegation.
- Onboarded and mentored 3 developers by guiding them through project architecture, codebase, and workflows, enabling a smooth reduction in ramp-up time.
- Refactored Angular components to implement PDF features (lazy loading, page selection), reducing PDF load time by 15% and processing time by 10%.
- Led HLD/LLD discussions and conducted code reviews, enhancing code quality and team alignment.

Software Engineer, Indegene – Noida, India Aug 2022 – Aug 2025

- Migrated the entire project to Angular 17 within 6 months and developed common reusable components, accelerating feature delivery by 25%.
- Contributed 60% of unit tests in Angular 17 migration, improving coverage and reducing bugs by 20%.
- Participated in HLD/LLD discussions and code reviews, improving code quality and fostering team collaboration.
- Resolved critical bugs and supported feature enhancements in Angular applications, improving stability and user experience.

Teaching Assistant, Geekaster – Delhi, India June 2022 – Aug 2022

- Assisted in online programming classes via Zoom by simplifying concepts, resolving doubts, and walking through live coding examples, improving student engagement and conceptual clarity.
- Provided one-on-one support during breakout sessions and after class hours, helping students build confidence in writing basic programs independently.

Projects

Codeil [github.com/file-sharing](https://github.com/dipankarmaurya/file-sharing)

- Developed a file-sharing web application using Node.js, HTML, and CSS that allows users to upload files and generate unique download links for secure sharing.

Education

Rajkiya Engineering College Sonbhadra – Bachelor of Technology in Computer Science June 2022

Shree Sahadev Inter College Bhonda Jaunpur – Senior Secondary (Science – PCM) June 2016

Achievements & Others

Language - English (Fluent), Hindi (Native)

AWS Certified Cloud Practitioner
